Amir Eslamdoust

Senior Frontend / Full-Stack Engineer

Berlin, Germany · amireslamdoust@gmail.com · linkedin.com/in/amireslamdoust

SUMMARY

Senior Frontend and Full-Stack engineer in Berlin, with 12 years across frontend, backend and cloud, and technical lead for three frontends at Kollex, working with about 5 teams while the platform grew from 500 to 5,000+ active customers. Built and rolled out an internal AI-agent developer-tooling platform (MCP servers, agent roles across four coding-agent engines, a skill system) with a security-review gate before anything installs. Has also designed, built and shipped two SaaS products solo, including Stripe payments. Speaker at Code Europe.

SELECTED ACHIEVEMENTS

- Built an internal AI-agent developer-tooling platform deployed across the engineering org: two MCP servers, eight agent roles across Claude Code, Codex, Copilot and Gemini, a tiered skill system and an AGENTS.md contract.
- Made the safety calls for it: read-only integrations to Jira, Datadog, GitHub, Figma and Miro, locked-down credential handling, and policy-enforced read/write access per agent role.
- Designed a reviewed-decision security gate (human review recorded before install); CI and the installer refuse to proceed without it.
- Ran it as an internal product: plugin marketplace with auto-update and SHA-versioned releases.
- Technical lead for three frontends (Backoffice, Merchant Center, promotions micro frontend): made most of the architecture decisions and did the main implementation, with teams growing around the work.
- Made the architecture calls while working with about 5 teams: GraphQL back to REST with OpenAPI contracts, micro frontends with Module Federation and DDD packages.
- Measured delivery: promotions team reached a 4-day median cycle time and 5.2 deploys per week in its first 12 weeks.
- 60% shorter integration time and 25% higher delivery velocity; cut support tickets by 30% by finding and fixing root causes.
- Designed, built and shipped two SaaS products solo — including the backend, the frontend and Stripe payments.
- Technical interviewer for essentially all frontend hires at Kollex.
- Raised Bookingkit's SLA from below 70% to 100%.

EXPERIENCE

Senior Frontend Engineer, Kollex

Apr 2021 – Present · Berlin, Germany · B2B beverage-ordering platform (joint venture of Coca-Cola, Bitburger, Krombacher, Chef Culinar)

- Technical lead for three frontends (Backoffice, Merchant Center, promotions micro frontend): made most of the architecture decisions and did the main implementation, with teams growing around the work; worked with about 5 teams.
- Built an internal AI-agent developer-tooling platform deployed across the engineering org: two MCP servers (shared memory; read-only Jira, Datadog, GitHub, Figma, Miro integrations with locked-down credential handling), eight agent roles across Claude Code, Codex, Copilot and Gemini with policy-enforced read/write access, a tiered skill system and AGENTS.md contract.
- Designed a reviewed-decision security gate: nothing installs without a recorded review, and CI and the installer refuse to proceed without it; shipped through an internal plugin marketplace with auto-update and SHA-versioned releases.
- Built the shared platform packages behind 6 main frontend applications: a multi-theme component library, a shared JS library for analytics and tracking, an OpenAPI-generated TypeScript client and end-to-end test suites.
- Set the quality bar: 90%+ unit test coverage, 100% integration coverage for endpoints, Cypress end-to-end tests in CI.
- Technical interviewer for essentially all frontend hires; informal mentoring of engineers across teams.

Full Stack Engineer, Lendis

Aug 2019 – Mar 2021 · Berlin, Germany

- Full-stack work on the Laravel backend (with Django alongside) and built the React frontend for the whole system in a team of three full-stack engineers.
- Built the Salesforce integration, a backoffice app for Sales and Logistics, Python sync scripts and Algolia search with access levels; moved the website from WordPress to Gatsby and introduced GCP.

Full Stack Engineer, Bookingkit
Oct 2018 – Jul 2019 · Berlin, Germany

- Raised SLA from below 70% to 100%; built Italian VAT reporting and the SumUp POS integration on a PHP backend; kept the booking widget working down to IE6.

Software Engineer, Team Lead, Parand Tech Group
May 2017 – Sep 2018 · Tehran, Iran

- Tech lead with 4–5 engineers replacing a legacy MVC system with Laravel + Angular; multi-lingual product built with remote teams in Denmark and the UK.

Senior Full Stack Engineer, Sharif University of Technology (LAITEC)
Jun 2016 – Apr 2017 · Tehran, Iran

- Turned an offline registration system into an online one; introduced PHPUnit + phpmd quality checks and CI/CD.

Software Engineer, Anetwork
Oct 2014 – May 2016 · Tehran, Iran

- Built HTML5 ads, migrated the platform to Laravel and built a Socket.IO chat.

SKILLS

Frontend: React, TypeScript (strict), JavaScript, Next.js, Redux, MobX, React Query (TanStack Query), Storybook, Gatsby, micro frontends (Module Federation), design systems, i18n

Backend: Node.js, NestJS, REST, OpenAPI, GraphQL, Socket.IO; earlier PHP/Laravel, Django, Python scripts

AI tooling: MCP servers, coding-agent roles and skill systems (Claude Code, Codex, Copilot, Gemini), agent security review gates; built a personalized AI assistant feature using user profile and behavioral history

Cloud & DevOps: AWS (Amplify, Cognito, S3, AppSync, Lambda, EC2, ECR, VPC, CloudFront, Route 53, SNS, SQS, SES, EventBridge, KMS, SSM, IAM with GitHub OIDC), Terraform, Docker Compose, GitHub Actions, CI/CD

Quality & Observability: Jest, Cypress, Datadog, Sentry, PostHog, CloudWatch

Data: PostgreSQL, MongoDB, DynamoDB, Redis (ElastiCache), Algolia

Payments: Payments integrations: Mollie, SumUp, Stripe

Mobile: React Native (Expo)

CERTIFICATION

Datadog: Beyond Collection: Building Observability with Logs

SPEAKING

Micro Frontends: From Savior to Dragon, Code Europe

EDUCATION

BSc Information Technology (Multimedia), University of Tabriz, 2010 – 2014

LANGUAGES

English (full professional) · German (elementary) · Persian (native)
